

# Syngrafii LongPen Printer™

## Syngrafii Delivers You More Revenue with Increased Customer Growth

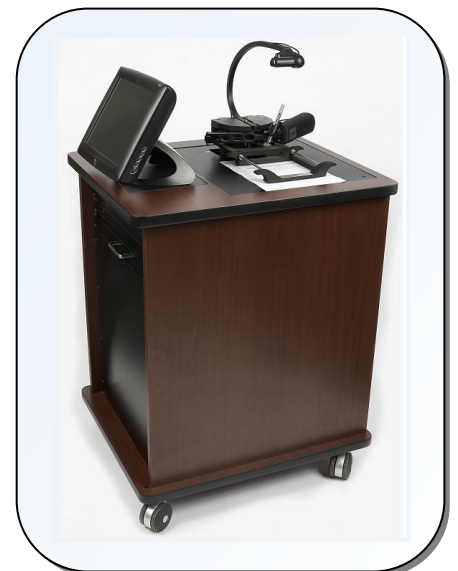

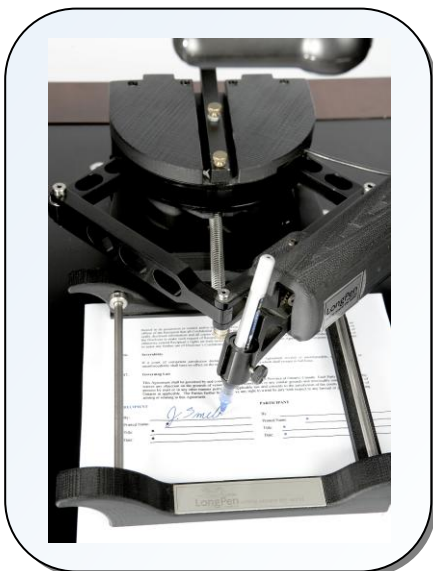

We enable 2 or more parties to complete transactions from anywhere worldwide, removing the delays & barriers associated with in-person paper based transactions.

**Market Differentiator:** We are the only eSignature solution worldwide that enables users to execute an original one-time use signature onto paper, a digital document or a hybrid process while supporting an organization's security, compliance and workflow requirements.

## Syngrafii LongPen Printer™ – Signature Execution onto an Original Document

The Syngrafii LongPen Printer™ is a hardware product that executes your one-time-use signature onto hard copy documents. When engaged in a live signing session, a remote agent places a hard copy document on the LongPen Printer™ where a document camera presents a live image of the document to the user. The user reviews the document through our signature capture software and executes their signature through this software. The LongPen Printer™ then executes the same speed, cadence and pressure of the signature onto a hard copy document. This document is now an original document that can be reviewed by forensic analysts and confirmed for identity and originality of the transaction.

Syngrafii's LongPen Printer™ with Syngrafii's Signature Capture Software, Digital Paper™ and MasterFile™ non-repudiation software provide signature execution onto hard copy documents and/or digital documents anytime, from anywhere.

## Specifications

### Syngrafii LongPen Printer™

<b>Capabilities</b>	<ul style="list-style-type: none"><li>Enables users to remotely apply wet signatures to paper documents from any location</li><li>Multiple users, in separate locations can sign the same document concurrently</li><li>Apply one-time use, biometrically accurate handwriting onto a paper document</li><li>Replicates a user's handwriting exactly as input, including pressure and cadence</li><li>Document camera that enables far end users to see exactly what they are signing</li><li>Operator software to enable complete control of signing workflow</li><li>Integrated with Syngrafii MasterFile™ to provide complete non-repudiation – metrics including before and after snapshots of documents</li><li>Ensures that sensitive documents are kept in a secure location</li><li>Enables immediate processing of paper documents without altering the current workflow</li><li>USB Connection to controller PC for easy setup</li></ul>
<b>Components</b>	<ul style="list-style-type: none"><li>Printer and Pen to apply signature</li><li>Document Camera</li><li>Document Holder</li><li>Controller PC with Printer driver and operator software</li></ul>
<b>Input and Outputs</b>	<ul style="list-style-type: none"><li>Power cable for Printer</li><li>Power cable for Controller PC</li><li>USB cable to Printer</li><li>USB cable to Document Camera</li><li>Network cable if applicable</li></ul>
<b>Devices and Accessories</b>	<ul style="list-style-type: none"><li>Best used with a <i>uni-ball Vision</i> fine tip pen</li><li>Printer can be placed into custom furniture solutions</li></ul>
<b>System Requirements</b>	<ul style="list-style-type: none"><li>Printer PC Controller with minimum dual core processor, 3GB Ram, Windows 7 preferred</li><li>Syngrafii MasterFile™ Server for non-repudiation</li><li>Syngrafii Transaction Web Server™ (T.W.S.) for communication with signing endpoints</li></ul>
<b>Security</b>	<ul style="list-style-type: none"><li>Transport using secure web services over TLS/SSL</li><li>128 bit SSL encryption from Printer to Tablets in peer to peer system</li><li>Memory is flushed after each application of a one-time signature</li></ul>
